mylife Loop powered by mylife CamAPS FX
Specifications

mylife Loop specifications	
Age limit:	The mylife CamAPS FX app is approved for people with type 1 diabetes aged one year and over, including pregnant women. Approved for people with type 1 diabetes aged two years and over when used in combination with Dexcom G6 or FreeStyle Libre 3 Plus, or aged four years and over when used in combination with FreeStyle Libre 3.
Phone compatibility:	Android smartphones compatible with Dexcom G6: www.dexcom.com/en-gb/compatibility/g6 Android smartphones compatible with FreeStyle Libre 3 / Libre 3 Plus: www.diabetescare.abbott/support/manuals (See document "Mobile Device & OS Compatibility"). If using a FreeStyle Libre 3 / Libre 3 Plus Sensor, please ensure you have an Android smart device with NFC (near field communication).
Compatible CGM (Continuous Glucose Monitoring) sensors:	Dexcom G6: factory calibrated, manual calibration possible, blood glucose tests only needed in exceptional cases (consult the Dexcom G6 Instructions for Use). FreeStyle Libre 3 / Libre 3 Plus: factory calibrated, no manual calibration necessary, blood glucose tests only needed in exceptional cases (consult the FreeStyle Libre 3 / Libre 3 Plus Instructions for Use).
Total daily dose (TDD) and weight range:	5–350 units/day total daily insulin (TDD) 10–300 kg body weight
Algorithm:	Treat to target Predictive control (the algorithm calculates the insulin requirement for the next 2.5–4 hours) Adaptive model (insulin delivery is adjusted every 8–12 minutes)
Learning:	Continually adjusting insulin delivery every 8–12 minutes based on CGM glucose data received every minute (FreeStyle Libre 3 / Libre 3 Plus) or every 5 minutes (Dexcom G6). Learning from previous insulin delivery and meal bolus information to adapt to diurnal, day-to-day as well as post-meal insulin needs.
Glucose target:	Default target: 5.8 mmol/L (104 mg/dL) Customisable personal glucose target in 30 minute segments across the 24 hours of the day in a range from 4.4–11.0 mmol/L (80–198 mg/dL)
Insulin compatibility:	Any rapid or ultra-rapid acting insulin compatible with the mylife YpsoPump insulin pump (consult the mylife YpsoPump Instructions for Use).
Watertightness of system components:	The mylife YpsoPump insulin pump is fully waterproof (IPX8). The Dexcom G6 sensor is waterproof for 2.4 metres. The FreeStyle Libre 3 / Libre 3 Plus sensor is waterproof in up to 1 m water depth for up to 30 minutes.
Data sharing:	Yes, via: mylife CamAPS FX app on smartphone: generation and export of PDF reports including glucose statistics, insulin statistics, Auto mode and alert statistics, information about settings and weekly overviews. Internet connectivity and consent to share data are required to generate PDF reports. mylife Cloud and Glooko®: automated data upload from the mylife CamAPS FX app to the mylife Cloud or Glooko® platform to share data with healthcare professionals. Internet connectivity and consent to share data are required to upload data to the mylife Cloud or Glooko®.

mylife Loop CamAPS FX

mylife Loop specifications

Remote monitoring:	Yes, via: Companion remote monitoring: The mylife CamAPS FX app allows user's data to be shared with up to 10 "companions". Remote monitoring is integrated into the app and therefore both, user and "companion", use the mylife CamAPS FX app. Companion remote monitoring mirrors the data from the user's mylife CamAPS FX app. CGM data, insulin data and other data as well as alerts are mirrored in the "companion's" mylife CamAPS FX app. "Companions" may set different alerts and alerts to those set on the user's CamAPS FX app. No insulin amending features (Boost, Ease-Off, Bolus Calculator, etc.) will be able to be used on the Companion app. For safety reasons, these features must be actioned on the user's app. Internet connectivity and consent to share data are required to share data with "companions". SMS based remote monitoring: the mylife CamAPS FX app supports SMS based remote monitoring. All mylife CamAPS FX app generated alarms and alerts will be sent via SMS message to up to 5 "followers". Users must have a SIM-Card to allow SMS to be sent from their phone. We advise users to check their mobile plan includes SMS coverage. It is possible to use the Companion remote monitoring and SMS based remote monitoring at the same time. Both, Companion and SMS remote monitoring function, can be made inactive when they are not needed in the share menu of the child's / young adult's mylife CamAPS FX app.
Discrete bolusing:	Yes, via mylife CamAPS FX app on smartphone
Bolus suggestion calculator:	Yes, via mylife CamAPS FX app on smartphone
Additional features:	"Boost" and "Ease-off" modes Add meal function with 3 options (meal or snack, hypoglycaemia treatment and slowly absorbed meal)
Training:	Complete the mylife CamAPS FX in-app training and you are ready to start using the system as a certified mylife CamAPS FX user. You are able to download the mylife CamAPS FX app from Google Play Store and link it to a virtual pump and CGM to use it in demo mode. This will allow you to practice using features like "Boost", "Ease-off" and the bolus calculator.

Consult the Instruction for Use of mylife CamAPS FX for further information.
